

COVID-19 Protocol

- We are not currently using our reception area. Upon arrival at our office, please remain in your car and a staff member will meet you to take your temperature and a pre-screening check-in.
 - o Following the ADA and CDC guidelines, if your temperature is greater than 100.4 you may be asked to reschedule your appointment.
- Before coming to our office, please answer the following questions:
 - o Have you traveled in the last 14 days?
 - o Do you have a fever, breathing difficulties, cough, loss of taste or smell, or any other flu-like symptoms?
 - o Have you been in contact with anyone that has tested positive for COVID-19 in the last 14 days?
- You must have your mouth and nose covered with your own face mask before entering the building.
- Only the patient receiving treatment is allowed in the office. Please leave children, other family members, and friends at home. We understand this may not always be possible and are flexible to accommodate if necessary. If this is the case, they will also need to wear a face mask and will go through the pre-screening check-in.
- We are increasing the amount of time between patients to allow for less people in the building at one time. Thank you for your patience and understanding.
